

Comparison between GenericServlet and HttpServlet

Feature	GenericServlet	HttpServlet
Package	javax.servlet	javax.servlet.http
Protocol Support	Protocol-independent (can handle any protocol)	Protocol-dependent (only HTTP)
Usage	Used for general-purpose servlets	Used for web-based applications
Inheritance	Extends Object class	Extends GenericServlet
Methods Used	service() method	doGet(), doPost(), doPut(), doDelete()
Request Handling	Handles all requests using single service() method	Handles different HTTP requests using separate methods
Ease of Use	Less convenient for web applications	More convenient for web applications
Functionality	Limited support for HTTP features	Full support for HTTP features (cookies, sessions)
Common Usage	Rarely used	Widely used
Flexibility	More flexible (works with different protocols)	Less flexible (only HTTP)
Example Protocols	FTP, SMTP, HTTP	Only HTTP
